(54) IMAGE PICKUP SYSTEM, IMAGE PICKUP DEVICE, COMMUNICATION DEVICE AND ITS CONTROL METHOD AND STORAGE MEDIUM

(57)Abstract:

PROBLEM TO BE SOLVED: To provide an image pickup system where an image pickup device such as an electronic camera can recognize an operating state of a communication device such as a cellular phone.

SOLUTION: In the image pickup system consisting of at least one image pickup device (100) and of at least one communication device (300), the communication device has a communication unit and antennas (330, 332) that transmit an operating state of the communication device to the image pickup device, and the image pickup device has an image pickup element (14), an antenna and communication units (112, 110) that receive the informed operating state, a system control circuit (50) that discriminates the received operating state of the communication device, and display means (28, 54) that display the operating state of the communication device depending on the result of discrimination.
